» [Read posts](#) from The Well-Being Journal - our blog covering the bottom line on well-being improvement.

[Healthways Webinars](#)

Our Approach

We listen to our customers, apply science and technology, prepare our professionals for success, and demonstrate our results. It's an approach that has helped us improve well-being and deliver value for three decades.

Collaborate with Customers

What are your priorities? Reduce

Apply Science

Healthways is committed to applying and advancing science to improve well-being. We partner with external experts and develop and test proprietary models to enhance current and future capabilities. The Healthways Center for Health Research evaluates the validity of our solutions and publishes peer-reviewed results with industry-wide relevance.

Prepare our Professionals

Embrace Technology

Our Embrace™ technology platform earned Healthways a top 10 ranking among technology innovators. We invest in the technology necessary for scalable, cost-effective support across large populations.

Demonstrate Results

For every solution, we define metrics that reflect customer objectives and measure our success. We make adjustments where needed to elevate

Win Win – win for customer and win for the firm

Analytics case studies– created by Gopal Prasad Malakar

Health services can be improved

- Information about
 - local event &
 - weather anomaly and
 - past information about their impact can help greatly
- Inform people about what can they do to safe guard themselves
- Big healthcare expense can be saved as well as people can get better life

TELECOM INDUSTRY

Save expense of customer – reduce churn

- Rates : fixed rental + per minute charges * # of minutes

- Ask **selected few in red circle** to shift to correct rate plan
- Suggest account holder in blue circle to shift to corporate / business plan

Grow business

- Search phone numbers of other networks making too many incoming calls in your network
- Ask sales agent to call and suggest those phone numbers that if they were on same network they would have saved a lot
- Inform customer about the savings amount

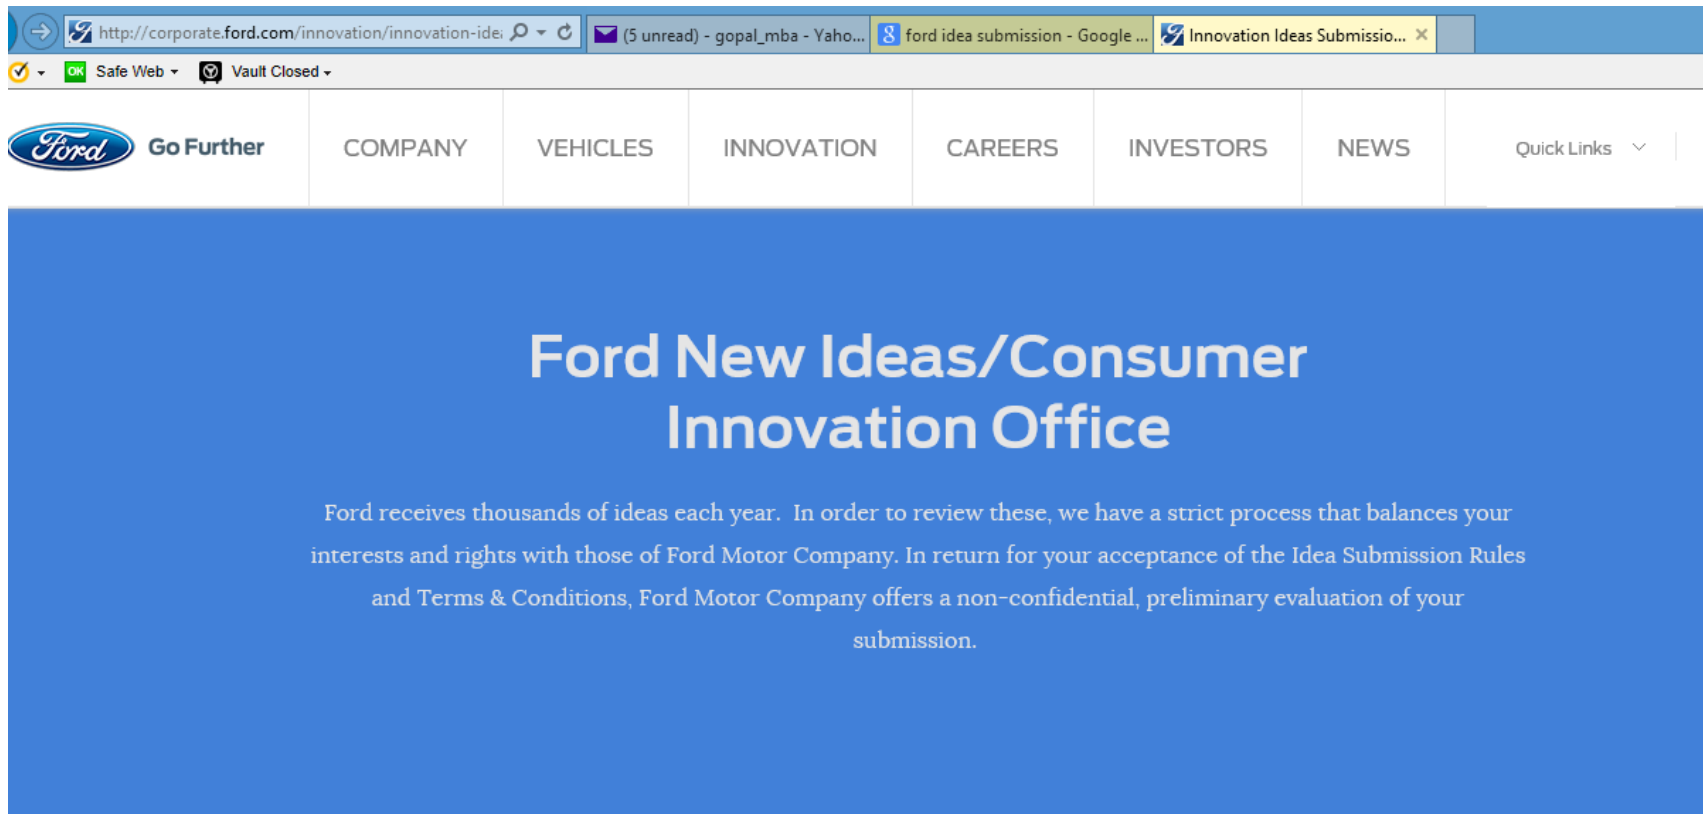

O2 mobile network - UK

- Mobile internet : challenge because of smaller screen
- What should be presented on this, a challenge?
- O2 came with
 - ✓ First check preference of customer
 - ✓ Initial set of content based on chosen preference
 - ✓ Propriety algorithm to understand customer's changing preference or
 - ✓ Customer interest on a particular news topic
 - ✓ **How many people** would have preferred computer to predict their preference?
 - ✓ 97% of the users liked O2 to provide content based on intelligence
- 50% of UK's total mobile internet usage on O2 mobile network

AUTOMOBILE INDUSTRY

Ford Figo success story

- Earlier philosophy : produce first and then put effort to sell it
- Evolved philosophy : let's develop what is the need
- Ford websites played a big role

Is this the right place for your idea?

Ford Figo success story

- Helped ford to know customer need
- Design based on market need
- Production schedule as per customer need
- Inventory of needed product
- Figo – spectacular success because of need based design
 - Size
 - Price
 - Comfort

► High Attrition Likely This Year on Upbeat Job Market: Report

New Delhi:

Ford India's compact car or hatchback [Figo crossed the 3,00,000 sales mark in its third year](#), the company said earlier this week. The car which has been a runaway hit helped Ford turn around its fortunes in India, analysts say.

TRANSPORT INDUSTRY

Uber

- Let people see where is the cab
- How much time it should take
- Expected fair
- Security options – for customer and the car
- Pay from wallet
- Diver feedback

Uber

- Offers to get more customers –
 - something for sender and
 - receiver
- What more they can do? **OLA Café**

- **Signature analysis to forecast car issue for proactive maintenance**

ELECTRONICS INDUSTRY

Bestbuy: electronics industry

- Logical and **manageable** segment identification
 - ✓ Short on time mother
 - ✓ Happy go lucky youngster etc.
- Store within store concept as per customer need with subtle arrangement as per need
 - ✓ Mild music in home theater for short on time mother
- Specially trained resource per segment
- Specialized offers for subsequent sales – like limited period e-coupon for photo printer after purchase of digital camera
- Net result : sales were double in those stores in comparison of general stores

Best Buy bets big on store-within-store concepts

Article by: THOMAS LEE , Star Tribune | Updated: July 14, 2013 - 6:57 AM

The electronics giant is remaking the way it sells to customers, but will the changes drive sales?

resize text print buy reprints

Share 0 Tweet 27

The sign outside the big box in Richfield says Best Buy, but the inside of the building looks more like a mall than a single store.

The usual Blue Shirts and Geek Squad agents scurry across the sales floor, but Samsung, Microsoft, Pacific Kitchen and Magnolia occupy their own domains within Best Buy. They have large product displays, dedicated checkout areas, and employees wearing shirts that are distinctively not blue.

Best Buy stores are becoming more complex these days as CEO Hubert Joly has aggressively pursued a "store-within-a-store" concept more common among department stores and Asian retailers.

"Best Buy is really hustling to find its strategic way forward," said Robin Lewis, CEO of the Robin Report, a newsletter that tracks the retail industry.

How iTunes Genius Really Works

An Apple engineer discloses how the company's premier recommendation engine parses millions of iTunes libraries.

Ever since the feature debuted in 2008, there's been a lot of [speculation](#) about how iTunes Genius accomplishes its playlist-building magic. Now an engineer at Apple that works on the iTunes Genius team has revealed some [tantalizing clues](#)—a rare disclosure for the famously secretive company.

Recapitulating what Steve Jobs has said previously about iTunes Genius, Apple engineer Erik Goldman writes in his [post on Quora](#) that the starting point for the Genius service is a packet of usage data—what songs a user has in his or her library (and, presumably, how often he or she plays them)—sent from the iTunes application which is “folded into a larger database of users and songs.”

Basically, your library of tracks is compared to all the other Genius users' libraries of tracks. Apple then runs a set of previously secret algorithms, which Goldman described as

RETAIL INDUSTRY

Wal-Mart : retail chain

- Great integration of whole supply chain
- Coordinated production, supply, sell etc.
- Relentlessly pursue improved operational efficiencies
- Develop deep knowledge of its customers
- Greater insights about customer need **for an event**:
 - ✓ People **stock** food which doesn't require refrigeration and cooking just before hurricane
- Insures sufficient supply of these before such events due to integrated SCM

CASE STUDY - WALMART: SCRIPTING SUCCESS THROUGH CUSTOMER ANALYTICS

 Kanaka B

08/2013;

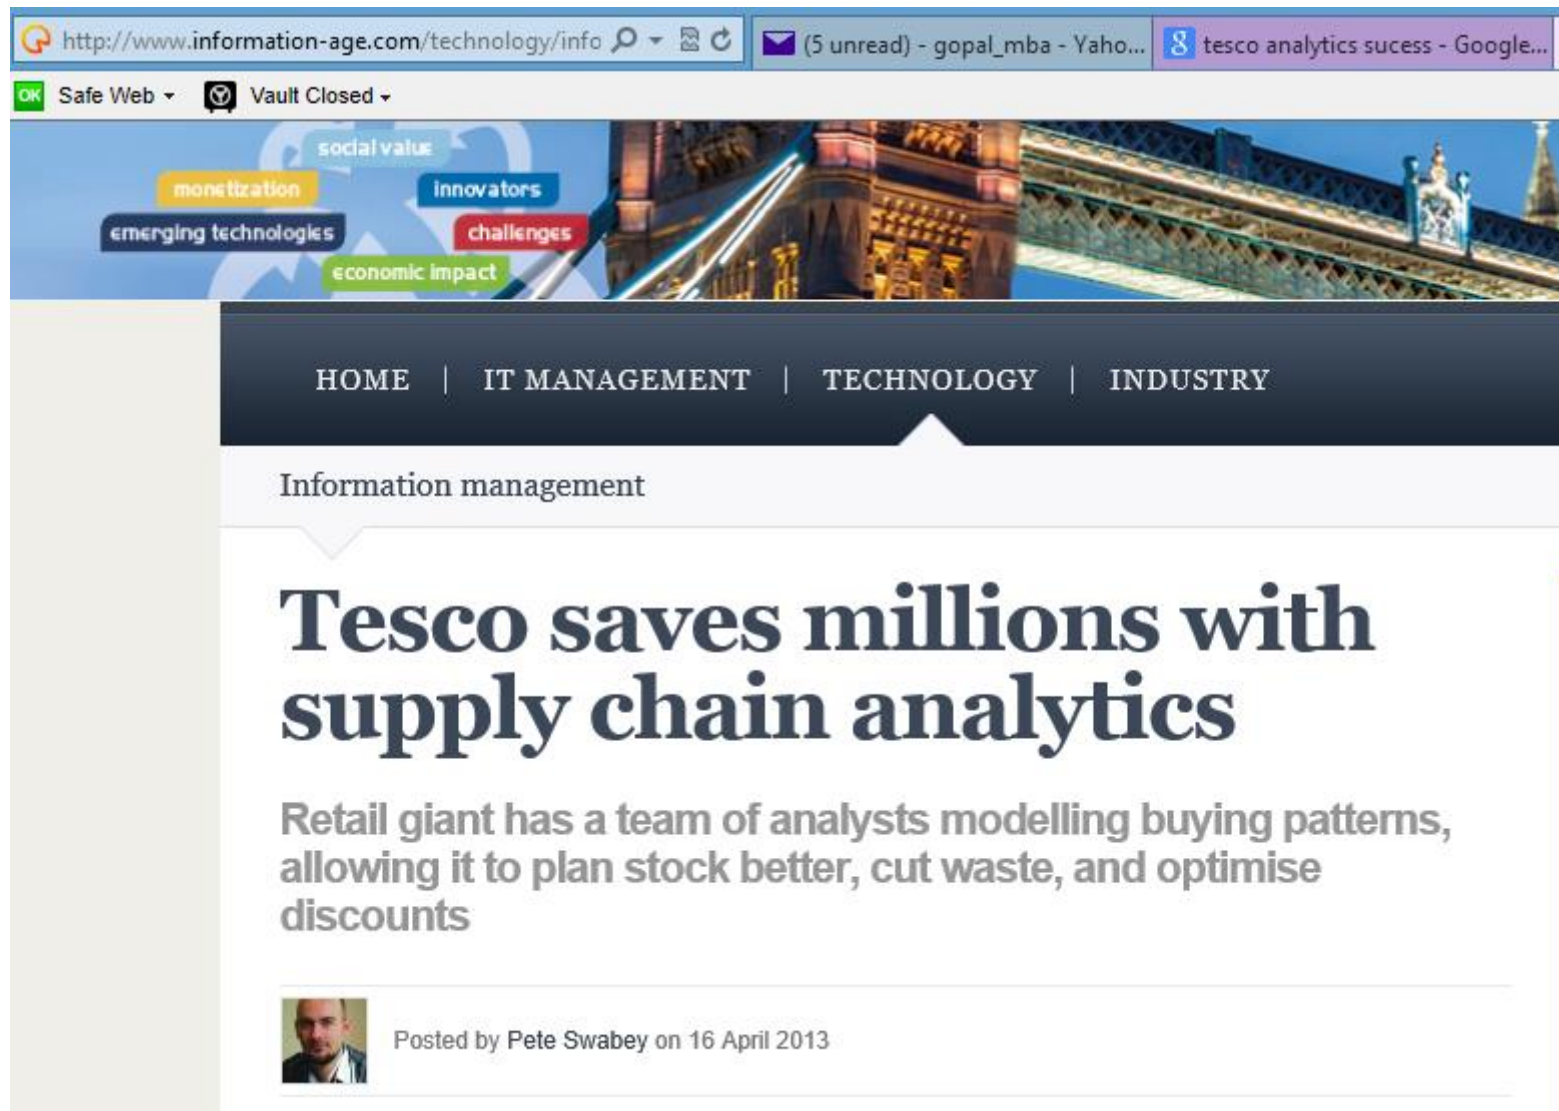

ABSTRACT Retail chain Walmart, ranked no. 1 in the Fortune 500 list of largest US companies, had sales of \$466 billion in fiscal year 2013. Walmart's supply chain operational competitiveness was legendary. The company operated more than 4,000 stores in the US as of January 2013. Walmart had more customer connections than any other retailer in the world. Walmart had strong presence in social and digital media as well. More than 300,000 people accessed Walmart through social media, per week, in 2012. Most of the customer data were being collected from in-store and online transactions and also from social media conversations. Walmart had effectively used customer analytics to improve operational performance. Customer analytics enabled to know about consumer preferences from social media to gain competitive advantage. Walmart used customer analytics to increase customer base by spending on marketing and promotional activities. Walmart's prime challenges in the online media were from Amazon (world's largest online retailer) to attract customers in the online segment. Hence Walmart had to improve upon its customer analytics advantages and stay ahead in the retail segment overcoming the challenges posed by Amazon in the eCommerce space. Amidst this background, it remained to be seen whether Walmart would succeed in establishing a stronger foothold in the retail market using customer analytics in the long run.

Tesco : retail chain

- Started club card in 1995, which is necessary to capture purchase behavior
- Optimal segmentation
- Groups customer based on their behavior
 - ✓ Value conscious customer - buys what is on sale, uses coupons sent in the mail
 - ✓ Convenience seeker - 3 / 4 purchases per week all for prepared food, rarely changes his purchase regardless of promotion,
- Who should be targeted?
- Targeted and timed next offer
- Measure the impact of promotion
- Weather impact on purchase behavior
- Hot weather → barbecue meat,
- Cold weather → cat litter (cats are less likely to leave the house in the winter)
- Not simply stocking also contextual

Tesco : retail chain

The screenshot shows a web browser window with the address bar displaying <http://www.information-age.com/technology/info>. The browser's address bar also shows a search icon, a refresh icon, and a notification for 5 unread emails from gopal_mba on Yahoo. The browser's status bar shows 'Safe Web' and 'Vault Closed'. The page features a large banner image of a building at night with a blue sky. Overlaid on the banner are several colored boxes with text: 'social value' (blue), 'monetization' (orange), 'innovators' (blue), 'emerging technologies' (dark blue), 'challenges' (red), and 'economic impact' (green). Below the banner is a dark blue navigation bar with white text links: HOME | IT MANAGEMENT | TECHNOLOGY | INDUSTRY. Below the navigation bar is a light gray section with the text 'Information management'. The main content area has a white background and features the article title 'Tesco saves millions with supply chain analytics' in a large, bold, dark blue font. Below the title is a subtitle in a smaller, gray font: 'Retail giant has a team of analysts modelling buying patterns, allowing it to plan stock better, cut waste, and optimise discounts'. At the bottom of the article is a small profile picture of Pete Swabey and the text 'Posted by Pete Swabey on 16 April 2013'.

Tesco saves millions with supply chain analytics

Retail giant has a team of analysts modelling buying patterns, allowing it to plan stock better, cut waste, and optimise discounts

Posted by Pete Swabey on 16 April 2013

Tesco : retail chain

The supply chain analytics team took all the data Tesco had about its historical promotions, and built a detailed predictive model. This pulled in all manner of variables, including the positioning of a discounted product in a store and what other offers were operating at the same time.

That has revealed some interesting insights. For example, a "buy one, get one free" offer works better than a 50% discount for non-perishable goods, such as a cooking sauces, but the reverse is true for fruit and vegetables.

To push these insights out into the stores, the supply chain analytics team built a web-based workflow system that allow stock controllers to access a sales uplift forecast for their specific store, and use it to plan their orders.

This system, Apthorp says, has allowed Tesco to take £50 million-worth of stock out of its depots.

All of this was possible, he explains, because Tesco sorted out its data infrastructure 15 years ago, when it implemented a Teradata enterprise data warehouse alongside its IBM mainframe.

As it happens, though, the supply chain analytics team recently bought its own Teradata data warehouse, which replicates the primary data set, which Apthorp says has increase the frequency and complexity of the analyses it can do.

SPORTS INDUSTRY

Moneyball : HR analytics

- Moneyball: The Art of Winning an Unfair Game : By Michael Lewis (2003)
- About the Oakland Athletics baseball team and its general manager Billy Beane.
- Its focus is the team's analytical, evidence-based, sabermetric approach to assembling a competitive baseball team, despite Oakland's disadvantaged revenue situation.
- A film based on the book starring Brad Pitt was released in 2011.
- Any player brings
 - ✓ speed,
 - ✓ strength,
 - ✓ attitude and character. Mental toughness (possibility of winning even when u lost in first half)
- Amendment: reassessing players every year to ensure one gets what he deserves
- Great players left out due to team fitment issues

CEMENT SUPPLY BUSINESS

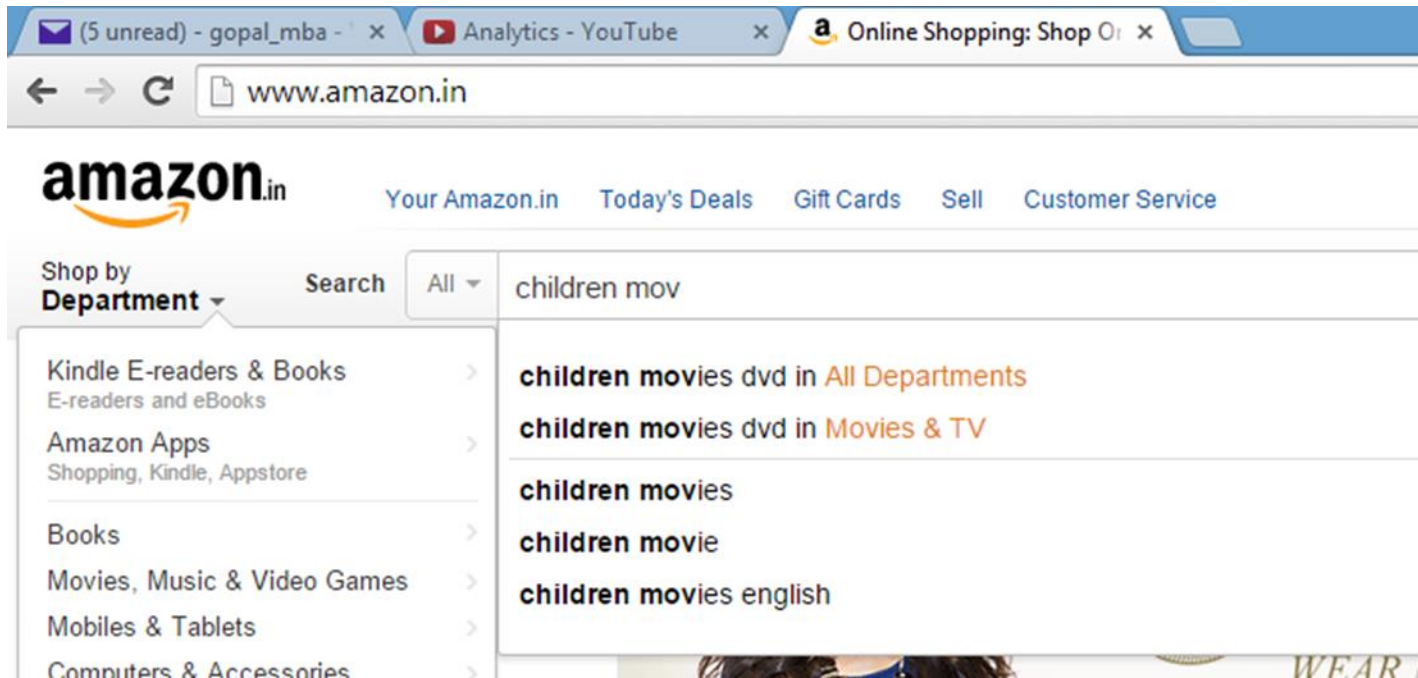

CEMEX – cement delivery unit in Mexico

- Cement is highly perishable on under construction site
- Construction companies need cement in time and ready to pay premium
- CEMEX
 - ✓ with satellite links,
 - ✓ expert systems, and
 - ✓ a computer in every truck
 - ✓ predictive analytics to check for demand
 - ✓ **routing optimization** for efficient delivery,
 - ✓ Scheduling quicker delivery
- increased productivity of trucks by 35%
- Customers paid premium for quicker delivery

GOOGLE APPS

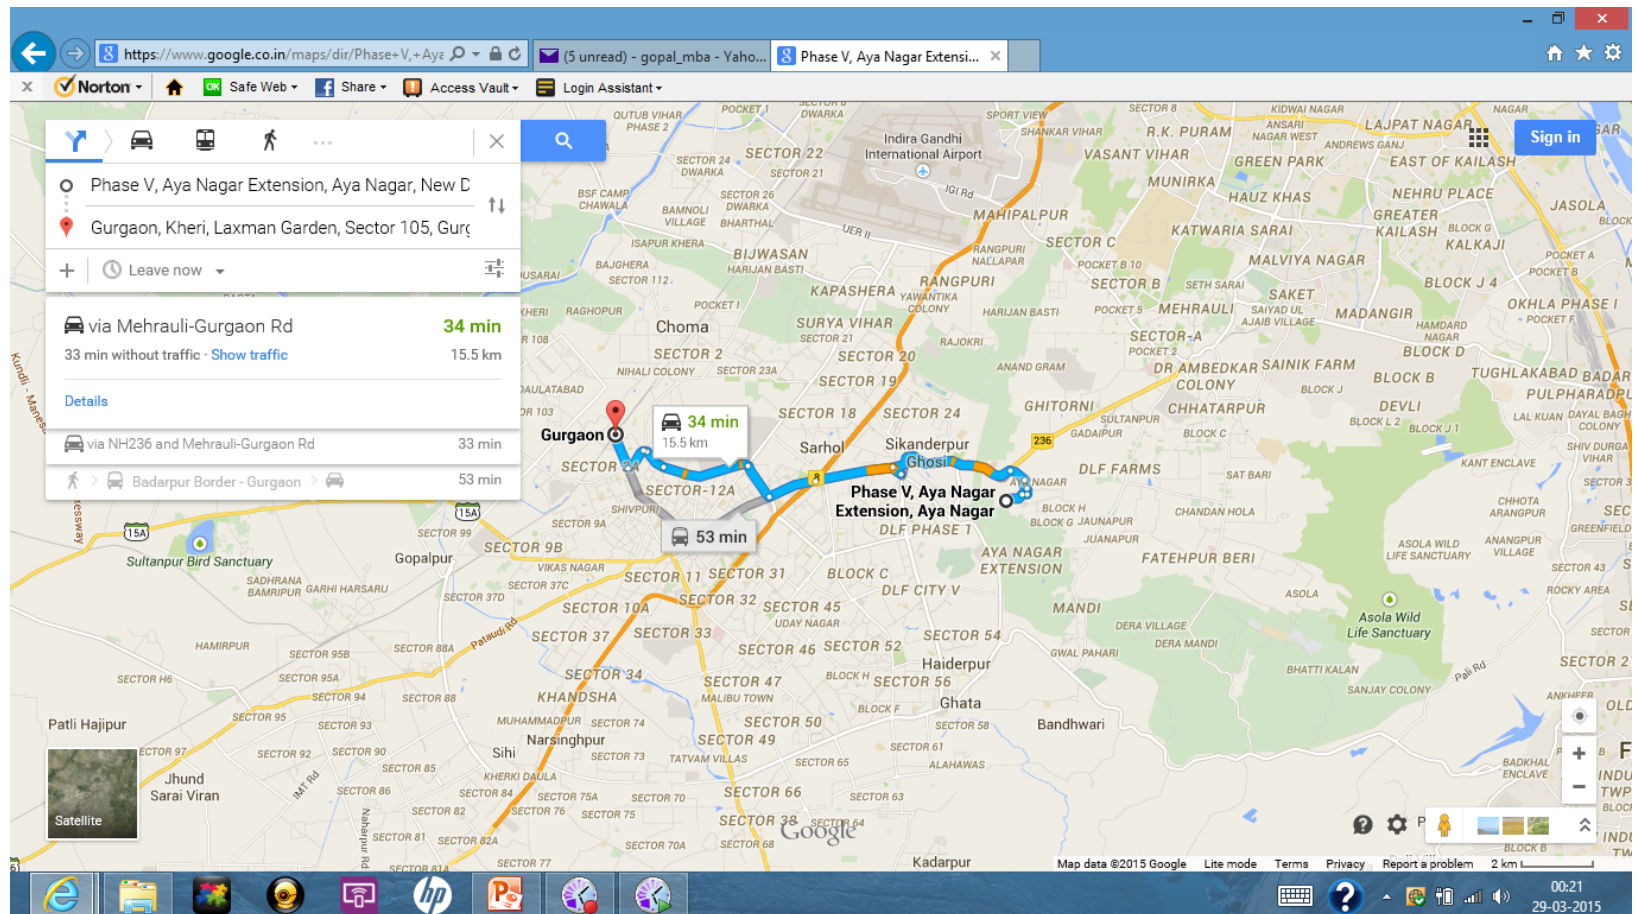

Google- search engine

- Careful Test and Control strategy for change in algorithm
- **Captures** almost all the aspects of experiment automatically
- Easy – which links were clicked? How much time spent on pages?
- Even human judgment is collected using techniques like heat map

Google map

- Ever evolving
- Searches location and
- Gives route based on transport (public, personal etc.)

Google map

- Automatically throws correct route, which will take less time
- Reroutes when you can't take the prescribed route
- Knows your home, office and parking place
- When there is congestion, it throws more warning, before you start
- A big reason of success of android mobiles

CONTACT CENTRE

Improve pronunciation

- Employees making mistakes in pronunciation
- Words were mostly from the script
- Analytics helps us to figure out relative importance of different words
- QAs helped to detect the words which were pronounced wrongly
- **Wrongly pronounced more frequent terms** were selected
- Specific training was designed to improve on these words
- Result – employees communication efficiency increased

Basic targeting strategy

- Limited number of contact center employees
- No bandwidth to connect with all delinquent account holder
- Figure out who will pay on their own (with some finance charge)
- Who are the high risk customer, who must be contacted to get money else it will turn out bad debt
- Good customer feel better
- Firm also saves on bad customer

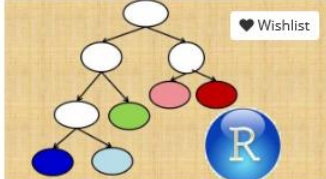

Early (2-3 due) Stage Strategy
